

LiFeBlue Battery Cycle Life Beats ALL Competition

LiFeBlue Battery has ***the highest tested cycle life*** out of all drop in Li batteries. Why? Our cells are designed, manufactured, tested and certified by one company using the most advanced technology. Most other battery companies don't design or build the Li cells used in their batteries.

The cycle life test chart above shows that LiFeBlue Battery provides over 2800 cycles with 83% remaining capacity. This test was performed under the most severe test conditions: discharging at 77 degrees at a 1C rate to 100% Depth of Discharge (DoD).

No other battery compares!

LiFeBlue Battery

For The Longest Life!
